

Quality Irrigation Products

The drop weights on the center pivot irrigation system can stabilize sprinklers, preventing them from drifting or swinging due to wind and water pressure.

By holding the drop hose steady, the sprinklers apply water more evenly, preventing over-watering or under-watering certain spots. It ensures the water droplets are not carried away by wind, reducing the water waste.

COIL WEIGHT

Save a fitting with integrated 3/4" hose barb x 3/4" MNPT connections. Hidden from theft - No Shiny Metal!

Product Number	Weight	
RTCW600	600g	

SLIP WEIGHT

It's made of HDPE, which is UV and corrosion resistant, the hose can insert the hollow, with clamp notch.

Product Number	Weight	
RTSW960	960g	

STEEL WEIGHT

Save a fitting with integrated 3/4" hose barb x 3/4" MNPT connections. It's made of steel with galvanized.

Product Number	Weight	
RTSW600	600g	

MODULAR WEIGHT

It can fit on to all Nelson type pressure regulators. The surface treatment is hot-dip galvanized.

Product Number	Weight	
RTMW360	360g	

MAGNUM WEIGHT

It is easy to install: thread into the bottom of the sprinkler. It is only compatible with I-Wob2 sprinkler.

Product Number	Weight	
RTMW450	450g
